

APRIL, 1859.

CITY OF LONDON

PHOTOGRAPHIC ESTABLISHMENT.

PRICE LIST

OF

PHOTOGRAPHIC APPARATUS AND
CHEMICAL MATERIALS,

MANUFACTURED AND SOLD BY

FREDERICK J. COX,

Optician, &c.

22, SKINNER STREET, LONDON.

ESTABLISHED **130 YEARS.**

*All Orders from the Country or abroad to be accompanied by a
remittance in cash, or Order for payment in London.*

No. 1. COMPLETE SET of Apparatus for the collodion process, for taking views $4\frac{1}{4}$ -in by $3\frac{1}{4}$ -in, including a camera with achromatic lens in brass tube, focussing glass, and a slide to hold the prepared plates, camera stand, gutta percha bath and dipper, glass plates, iodized collodion, nitrate of silver bath, developing solution, fixing solution, varnish, and book of instructions, in box £2 2 0

No. 2. COMPLETE APPARATUS for the collodion process, including an expanding camera with double achromatic lens to take portraits $4\frac{1}{4}$ -in. by $3\frac{1}{4}$ -in., tripod stand, gutta percha bath and dipper, plate box and plates, glass measure, glass funnel, box of scales and weights, collodion, nitrate of silver bath, developing solution, fixing solution, and varnish, in glass stoppered bottles, litmus paper and book of instructions, packed in a strong box £3 3 0

No. 3. Apparatus and Chemicals same as No. 2, but adapted for pictures up to $6\frac{1}{2}$ -in. by $4\frac{3}{4}$ -in., £5 5 0

No. 4 SUPERIOR polished Camera for the collodion process with double achromatic lens *of the best quality*, arranged for both views as well as portraits; capable of producing portraits up to $4\frac{1}{4}$ -in. by $3\frac{1}{4}$ -in., and views up to 5-in. by 4-in., including tripod stand, gutta percha bath and dipper, plate box, glass measure, funnel, printing frame, albumenized paper, porcelain pan, extra iodized collodion, nitrate of silver, proto-sulphate of iron, cyanide of potassium, glacial acetic acid, nitric acid, pyrogallie acid, hypo-sulphite of soda, gold solution and amber varnish, glass plates, scales and weights with glass pans, all of the best quality, complete in case with separate divisions for bottles, and lock and key £5 5 0

No. 5. COMPLETE SET OF APPARATUS SUITABLE FOR TOURISTS, taking Landscapes up to 7-in. by 6-in., consisting of a polished mahogany folding camera fitted with guaranteed lens in brass mounting, with stops, &c.; the camera made with double action, sliding front, dark slide, and focussing screen, tripod stand, gutta percha bath and dipper, plate box and plates, porcelain pans, glass measure, funnel, printing frame, scales and weights, prepared paper, and all the necessary chemicals, packed in case complete £9 9 0

No. 6. APPARATUS the same as No. 4, but adapted to take portraits up to $6\frac{1}{2}$ -in. by $4\frac{3}{4}$ -in., and views up to 7-in. by 6-in., consisting of a double achromatic lens of the *best quality* arranged for both portraits and landscapes, with an expanding camera, focussing screen, tripod stand, printing frame, bath and dipper, two plate boxes and twenty-four plates, two glass measures, two funnels, glass rod, set of scales and weights with glass pans, packet of albumenized paper, two pans, and all the necessary chemicals, including iodized collodion, nitrate of silver, pyrogallie acid, acetic acid, &c., &c. £9 9 0

No. 7. PORTABLE APPARATUS, arranged for taking views up 10-in. by 8-in., fitted with *guaranteed* lens, mounted in brass tubes, with rack-work adjustments, dark slide, sliding fronts to camera, tripod stand, bath and dipper, plate box and plates, 10-in. by 8-in., large and small measures, funnels, porcelain pans, scales with glass pans, and weights up to 1 oz, prepared paper and chemicals, including collodion, nitrate of silver, iodide of potassium, pyrogallie acid, chloride of gold, varnish, filtering paper, and every requisite for the whole process £18 18 0

No 8. A COMPLETE SET OF APPARATUS, adapted for taking portraits by the collodion process, up to $8\frac{1}{2}$ -in. by $6\frac{1}{2}$ -in., and

views by the collodion or waxed paper process, 9-in. by 7-in., with best mahogany expanding camera, dark slide for collodion pictures, and four frames for holding the plates, dark slide for views on paper, and focussing screen in frame, with a double combination achromatic lens *of the best quality*, mounted in brass with rack-work, to adapt for both views as well as portraiture. Camera stand, dipping bath, printing frame, porcelain washing pans, scales and weights, glass measures, funnels, glass plates, rods, and a full supply of waxed and iodized, albumenized, salted, and filtering papers, nitrate of silver, iodide of potassium, gallic acid, pyro-gallic acid, iodized collodion., hypo-sulphite of soda, glacial acetic acid, amber varnish, &c., packed in a strong case £21 0 0

F. Cox recommends the sets, Nos. 4, 5, 6, 7, and 8, as being of the very best quality; and with them (if required) a picture taken by the Instrument will be sent.

Stereoscopic Sets.

No. 2. SET of apparatus for taking stereoscopic pictures, with a walnut camera, mounted on table with beech screw, double combination achromatic lens, tripod stand, bath and dipper, plate box and plates, glass measure, funnel, scales and weights, collodion, nitrate of silver bath, developing solution, fixing solution and varnish, in glass stoppered bottles, litmus test paper, and book of instructions, the whole packed in box £4 0 0

No. 2. SUPERIOR French polished mahogany camera fitted with a best double achromatic lens, made with stop and adapter, for landscapes as well as portraiture, mounted on a mahogany table with parallel laths, capable of taking both stereoscopic pictures, and ordinary portraits up to $4\frac{1}{4}$ -in. by $3\frac{1}{4}$ -in., and views 5-in. by 4-in., with a mahogany tripod stand, gutta percha bath and dipper, plate box and plates, positive and negative collodion, nitrate of silver, chloride of gold, and all the necessary apparatus and chemicals, warranted of the best quality with a book of instructions, the whole packed in case, with separate divisions for bottles, &c. £7 7 0

No. 3. Model Tourist's stereoscopic camera with dark slides, lens, stand, focussing screen, plate box and plates, chemicals for the albumenized collodion process, and for printing on paper,

including a pressure frame, scales and weights, glass measures' pans, &c., &c. £9 9 0

Full practical instructions given to purchasers of complete sets; or if residing in the country or abroad, any further information than what is contained in the "Compendium of Photography," will be sent by letter.

ACHROMATIC LENSES FOR PHOTOGRAPHY.

Fig. 1.

Fig. 2.

The lenses chiefly used for Photographic purposes are the *meniscus*, the *single achromatic*, the *double achromatic*, and the *achromatic triplet*.

For **PORTRAITS**, or all objects that are likely to move, the double achromatic must be used, they are more rapid in their action, and consequently a shorter time of exposure of the sensitive plate or paper in the camera will be required.

For **LANDSCAPES** the single achromatic is best; they are always to be used with a small stop or diaphragm to contract the rays of light; the smaller size is for use in the bright sunshine, or when the points of the landscape are at a very considerable distance from each other. In all cases where the time of exposure is not an object, such as copying pictures, maps, &c., they are preferable to the double achromatic. The meniscus lens is now but seldom used, it is only useful for still life, and will require an allowance to be made after the focus has been obtained, as the chemical and visual foci of these lenses do not coincide.

For architectural purposes, or copying maps or drawings, the triplet is a very great improvement over the single achro-

matic, the difference is especially seen in copying, as the whole of the map or drawing up to the most extreme edge is in perfect focus; they require the time of exposure to be increased to about double that of the single achromatic.

PORTRAIT COMBINATIONS.

OF OUR OWN MANUFACTURE.

Double achromatic lenses consisting of a combination of four glasses to secure perfect achromatism and coincidence of the rays; in brass rackwork mountings of the best quality (MAKER'S NAME ENGRAVED.) *Fig. 1.*

For Portraits 10-in. by 8-in., with lenses 4-in. diameter,	£	s.	d.
very quick, and giving extreme clear pictures up to the edges
For Portraits, $8\frac{1}{2}$ -in by $6\frac{1}{2}$ -in.*
Ditto $6\frac{1}{2}$ -in by $4\frac{3}{4}$ -in.*
Ditto $4\frac{1}{4}$ -in by $3\frac{1}{4}$ -in.*
Ditto $3\frac{1}{4}$ -in by $2\frac{3}{4}$ -in.*
Ditto, for Locketts, &c.
	21	0	0

	1	18	0
	1	10	0
	1	5	0

A pair of small lenses suited for the stereoscopic camera, *fig. 7*, both of which can be guaranteed to be of the same focus and rapidity of action... 3 10 0

These lenses can also be had mounted with a stop and adapter, to reverse the front combination, by which means they are applicable for taking views, &c. There are stops set to render them useful in bright as well as dull weather.

For Portraits, $8\frac{1}{2}$ in by $6\frac{1}{2}$ in & Views 10 in by 8 in	10	10	0
Ditto $6\frac{1}{2}$ in by $4\frac{3}{4}$ in ditto 8 in by 6 in	4	10	0
Ditto $4\frac{1}{4}$ in by $3\frac{1}{4}$ in ditto 5 in by 4 in	2	2	0

SECOND QUALITY.

Portrait combinations of good average quality, the chemical and visual focus being corrected, with rackwork adjustments.

For Portraits up to $8\frac{1}{2}$ in by $6\frac{1}{2}$ in	9	9	0
Ditto $6\frac{1}{2}$ in by $4\frac{3}{4}$ in	2	15	0
Ditto $4\frac{1}{4}$ in by $3\frac{1}{4}$ in	1	5	0

Even cheaper can be had, but F. J. C. will not hold himself answerable for their action. Whole size, £5 5s.; half size, £2 2s.; quarter size, 15s.

* These four lenses can be had with Waterhouse's shifting diaphragm between the combinations for groups, or where depth of focus is especially desired, the additional cost will be 12/6, 15/, 17/6, 25/. respectively.

LANDSCAPE LENSES.

CONSISTING OF AN ACHROMATIC COMBINATION MOUNTED IN RACKWORK, WITH STOPS FOR REGULATING THE LIGHT, *Fig. 2.*

			£	s.	d.
Stereoscopic lenses $1\frac{3}{8}$ in diameter	1	1	0
$1\frac{3}{4}$ in diameter for pictures up to 5 in by 4 in	1	10	0
$2\frac{1}{4}$ in " ditto 8 in by 6 in	2	10	0

4 in " ditto 15 in by 12 in	...	9	10	0
5 in " ditto 18 in by 16 in	...	16	16	0

A pair of twin lenses of short focus, in brass sliding tubes, for the stereoscopic camera, *Fig. 7* ... 1 11 6

The foregoing lenses are confidently recommended as the best that can be produced, possessing the greatest rapidity of action, and giving a clear and sharp definition. The visual and chemical focus is also warranted to coincide.

Achromatic lenses unmounted. from 5s. to £3 each.

Meniscus lenses, from 2s. to 10s. each.

ACHROMATIC TRIplet OR Copying LENSES.

Fig. 3

This combination of lenses is the most suitable for copying maps or pictures of any description, also for architectural pur-

poses; the field is perfectly flat to the extreme edges and there is not the slightest distortion even in the marginal lines; the time of exposure required is about double that of the usual single achromatic lens.

They are mounted in strong brass tubes, with diaphragms between the lenses, and constructed so as to enable the operator to remove or alter the stop without unscrewing the glasses, *Fig. 3.*

No. 1 for pictures up to 5 in by 4 in.	2	2	0
„ 2 ditto 8 6 „	4	0	0
„ 3 ditto 10 8 „	6	10	0

Cameras,

Fig. 4.

Fig. 5.

Expanding Cameras, *Fig. 4.* for the collodion process, in walnut, with dark frame plate holders, and focussing glass.

For pictures up to $4\frac{1}{2}$ in by $3\frac{1}{2}$ in	0	10	6
Ditto $6\frac{1}{2}$ in by $4\frac{3}{4}$ in	0	14	6
Ditto $8\frac{1}{2}$ in by $6\frac{1}{2}$ in	1	1	0

An extra dark slide to these Cameras, 2s. to 4s.

EXPANDING SQUARE Cameras to admit the collodion plate either vertical or horizontal with two dark slides, and focussing glass.

For Pictures up to $4\frac{1}{2}$ in by $3\frac{1}{2}$ in	0	15	6
Ditto $6\frac{1}{2}$ in by $4\frac{3}{4}$ in	1	4	6
Ditto $8\frac{1}{2}$ in by $6\frac{1}{2}$ in	1	12	6

Ditto, ditto, *superior quality*, made of the best seasoned walnut, and polished.

For Pictures up to $4\frac{1}{2}$ in by $3\frac{1}{2}$ in	0	19	0
Ditto $6\frac{1}{2}$ $4\frac{3}{4}$	1	11	6
Ditto $8\frac{1}{2}$ $6\frac{1}{2}$	2	2	0

BEST MADE MAHOGANY CAMERAS

of good seasoned mahogany, French polished, with one dark slide, two inner frames and focussing glass.

SQUARE CAMERAS.

For Pictures up to	£	s.	d.
5 in. by 4 in ...	1	15	0
6½ " 4¾ " ...	2	6	0
* 8½ " 6½ " ...	4	0	0
* 10 " 8 " ...	5	0	0

If required for India or the Tropics, brass bound cameras are recommended.

SOLID LEATHER SLING CASES.

Made of the best patent leather, with straps for folding cameras.

				£	s.	d.
Best leather sling case to contain the camera and slides, for pictures up to 7 in by 6 in	1	5	0
Ditto, ditto, for pictures, 9 in by 7 in	1	12	0
Ditto, ditto, for pictures 12 in by 10 in	2	10	0

Larger sizes to order.

Leather sling cases for lenses only, 10s., 15s., 17s., and 1 0 0

BELLOWS CAMERA.

Made of best Spanish mahogany sliding front, dark slide, focus glass and two carriers for plates; the camera square to take the picture either vertical or horizontal, bottom broad hinged to fold up when travelling, an extra groove to carry the ground glass, all of the very best workmanship and materials.

For Views up to 9 in by 7 in.	6	0	0
Ditto 10 " 8 "	7	0	0
Ditto 12 " 10 "	9	9	0

These Cameras are highly recommended.

COPYING CAMERAS.

Copying Cameras are of two descriptions: the simplest form is intended for copying pictures, prints, &c., either smaller than the original, same size, or a trifle larger; these are termed *simple copying cameras*. There is also another description styled *enlarging cameras*, made with a double expanding body at each end, the lens is placed in the middle; they can be used either for reducing or enlarging negatives, or for producing transparent positives, either on ground or opal glass. (for further information

see "Photographic Tourist," 3rd edition) the lens best adapted for this purpose is the *achromatic triplet*, but the single achromatic may be used.

MAHOGANY COPYING camera, with great length of focus, with focus screen, plate holder and carriers

For pictures 5 in by 4 in	1	10
" 8 " 6 "	2	12 0
" 10 " 8 "	4	4 0

ENLARGING CAMERA consisting of a mahogany case, with a sliding body at each end, the lenses placed in the centre; this camera will enlarge a picture $3\frac{1}{4}$ in by $2\frac{3}{4}$ in, up to 5 in by 4 in, or reduce in the same proportion; it is also intended for the production of transparent positives, with focus screen, dark slide and carriers for negatives

Ditto for pictures up to 8 in by 6 in	2	12 6
" 10 " 8 "	4	0 0
" 10 " 8 "	6	6 0

They can be made cheaper of a commoner description, the above are the best of the kind.

STEREOSCOPIC CAMERAS.

Fig. 6.

Fig. 7

Stereoscopic cameras are made on two principles *fig. 6* and *fig. 7*. The instrument *fig. 6* has only one lens, but the camera is mounted on a lath which allows it to slide from the right to the left; the prepared collodion plate is placed in a dark slide, which also has the same movement. By this means one picture of a view is first taken; the camera is then moved to the other end of the bar, and the second picture is obtained.

Fig. 7 represents the Twin lens camera, and is the form most suited for pictures where rapidity is an object ; as both the caps of the lenses are removed at the same time, there is no possibility of the subject moving before the second picture is obtained ; but the plates will require to be cut in half and reversed, or placed right for left when the pictures are mounted.

PLAIN WALNUT camera, with dark slide for stereoscopic glasses mounted on beech table, with wood adjusting screw, as described by Latimer Clark, with Portrait lens complete £2 15 0

SUPERIOR French polished mahogany camera, on mahogany table, with parallel bar allowing a motion of 14 inches, or less if required. fitted with a *best quality* achromatic portrait lens of our own manufacture, *fig. 6* £5 0 0

Ditto, ditto with extra dark slide to take ordinary collodion portraits and views, up to 5 in by 4 in, fitted with a *best quality* lens, mounted with a stop and adapter, for views and portraits £5 15 6

*TWIN LENS Camera, with a pair of double achromatic lenses for portraits, the camera made of mahogany, with dark slide and focus glass, *fig. 7* £4 10 0

*Ditto ditto with two large aperture portrait lense, with stops, recommended as the very best that can be produced £6 0 0

MAHOGANY camera with two single achromatic lenses in brass sliding tubes, for landscapes, &c. £2 15 0

Best made Spanish Mahogany camera with double action rising front, which also has a movement to separate the lenses according to the distance of the view, mounted with a pair of very best landscape lenses, with leather caps as described in Photo. Notes, No. 69 £5 5 0

*A pair of Landscape lenses, in brass mountings to screw into the same flange, can be fitted to either of these cameras, at an additional cost of £1 11 6.

Cox's Model Tourists' Stereoscopic Cameras.

Fig. 8.

COX'S MODEL TOURISTS' stereoscopic camera, *fig. 8*. This camera is constructed on Latimer Clark's principle; it is made with six dark slides to carry prepared plates or paper. The top of the stand packs in the inside of the case, together with the camera, the whole exterior size of which is 11 in by 9 in. When required for use, the camera is fixed on the outside of the box, and that forms the table, on which the parallel lath is fitted. The camera mounted with *best achromatic lens*, six dark slides, ash stand and metal triangular top, packed complete £6 10 0

Ditto, ditto fitted with twin lenses. In this apparatus there is no fixing required as the packing case forms the body of the camera: the most portable Binocular camera for the dry process yet introduced. See *Photographic Tourist*, 3rd edition, page 56,

The price of the camera with a pair of twin lenses, six dark slides, and light but firm stand, the whole of which pack into a mahogany case, 10 in by 8 in, and 9 in deep, weighing under 7½ lbs. £7 7 0

TOURISTS' STEREOSCOPIC CAMERA, for either the wet or dry collodion process, the camera of mahogany with one dark slide *best single achromatic lens*, tripod stand, tight top bath, and dipper, bottles for holding the necessary chemicals, tripod stand and 1 doz. glass plates, the whole apparatus packing in a case similar to *fig. 8*: the case has divisions inside for the glass plates or finished pictures; price complete, with stand and water bottle 6 6 0

A Tent suitable for this camera will cost 50s.

CAMERA STANDS.

Ditto ditto ... 10 „ 8 „				0 12 6

The 10 in. by 8 in. and larger sizes, may be had with the bars placed in a longitudinal direction, by this means they are more available for printing from several small negatives at one time, at 1s. each extra.

VIGNETTE GLASSES.

These glasses are intended to produce the Vignette style of printing either on paper or glass positives ; they are made of two descriptions, viz. opaque centres and transparent centres, those with a transparent centre are for printing on paper, they are to be simply laid outside the pressure frame. The opaque centre is intended to be laid in the dark slide of the camera after the plate has been exposed, but before it is developed; a momentary exposure to daylight is sufficient to solarize the edges of the plate without interfering with the body of the picture.

The black glass avoids the necessity of backing the pictures, and the metal plates are recommended for brooches, or rings, &c., as they can readily be cut with a pair of scissors to the required shape. The leather tablets are intended for transfer pictures, see the "Compendium of Photography; for the opal glass, see "Photographic Tourist, 3rd Edition."

ALABASTRINE SOLUTION AND VARNISH.

These Preparations are carefully prepared, and can be recommended as producing the Alabastrine effect on a Collodion Positive in a few minutes without the aid of artificial heat. The Varnish is admirably adapted both for these Pictures or any Positive where it is intended to be coloured afterwards. Toning Solution, 4oz. bottle 1s.; Varnish, 2oz. bottle 1s.

FISHER'S LIPASKATHIARON or GLASS POLISH

for instantly cleaning glass without the aid of water. It is strongly recommended, being entirely free from acid, and guaranteed to contain nothing injurious to the most sensitive bath. Price 6d. per bottle, sufficient for 100 plates, with directions for use.

Illustrated Price Lists of MAGIC LANTERNS AND DISSOLVING VIEWS, Post free on receipt of two stamps.

Illustrated Price Lists of ACHROMATIC TELESCOPES AND MICROSCOPES, Post free on receipt of two stamps.

FOURTH EDITION, price 6d., Post free, 7d.

A COMPENDIUM OF PHOTOGRAPHY

Containing directions for the Positive and Negative Collodion process, more especially as applicable to portraiture; entirely re-written, and a fresh chapter on failures, and their remedies, with instructions for copying pictures, and the method of producing Stereoscopic Portraits, and colouring Photographs.

BY FREDERICK J. COX.

Just ready, **THIRD EDITION**. 1s. Post free 13 stamps

THE PHOTOGRAPHIC TOURIST.

BY FREDERICK J. COX.

F. Cox begs to call the attention of Photographers, &c., to the foregoing List of Prices, and to state that they are the prices of the articles delivered free in London. Remittances from the Country must allow sufficient to pay the expense of a packing case, which will be credited if the empty is returned free.

Orders from the country, or abroad, accompanied by a remittance, will meet with immediate attention.

Post Office Orders to be made payable to **FREDERICK Cox**, at the General Post Office.

Any information will be given to Photographers or Amateurs who may be in want of the same, by enclosing a stamped envelope for a reply.
